

## Environmental Policy

Livingstone is committed to developing controls and solutions to environmental aspects and impacts related to our overall operational and construction activities. We will continue to advance our environmental management systems and plan our activities to sustain the natural environment for future generations.

Livingstone will achieve this by:

- Complying with all relevant legal and statutory legislation, regulations, codes of practice, standards, and guidelines that relate to our construction activities.
- Continually improving our environmental process and performance by providing the resources to set objectives and responding to the findings of regular site audits.
- Protecting the natural environment and preventing pollution by developing procedures which all employees, contractors and visitors will be required to follow.
- Encouraging and supporting waste minimisation, the diversion of waste from landfill and responsible disposal.
- Encouraging our subcontractors and suppliers to improve their environmental awareness and performance.

The success of this Environmental Policy will only be achieved by the active participation of all workers.
